1 **Quotes arrive everywhere**
PDFs, phone photos and WhatsApp messages, mostly in Arabic, from many suppliers.

2 **Copied by hand into Excel**
Prices are re-typed line by line, so typos and old prices slip in.

3 **Unit price hides the real cost**
Different pack sizes and delivery fees make the cheapest-looking quote not the cheapest order.

4 **Nobody can prove the saving**
There is no record of what was compared, who approved, and what was actually saved.

Fictional supplier, demo data.

What ProcurePilot is

For **multi-branch restaurant groups in Egypt and Saudi Arabia** whose suppliers send quotes in Arabic, as PDFs, photos and WhatsApp messages, ProcurePilot is **purchasing software built in Arabic** that reads those quotes, compares them on their true landed cost, and counts a saving only once someone on the team verifies it. Unlike WhatsApp threads and Excel sheets, it works in the team's own language and currency, and keeps a person approving every purchase.

LEAD PILLAR

Built in Arabic

Reads Arabic supplier quotes and works in an Arabic or English interface, in EGP and SAR with each country's VAT.

SECOND PILLAR

Savings you can verify

A saving counts only once someone checks its evidence. A person approves every purchase, within budget.

SUPPORTING PROOF

Every price traced

Each price links back to its quote; offers are compared pack for pack with delivery fees.

How it works: from RFQ to verified saving

1

Ask

One request for quotation goes to every supplier. A person presses send.

2

Read

Quotes from email, uploads and saved WhatsApp files are read, line by line.

3

Check

Every line links to its source page with a confidence score and is reviewed.

4

Compare

Pack for pack, delivery fees included, scoring shown. Split the order if cheaper.

5

Approve

The request reaches the approver with the remaining budget — on web or phone.

6

Verify

The purchase order goes out; the saving counts once its evidence is verified.

Automation prepares and routes. A human authorises every purchase.

Reads the quotes your suppliers already send

By email or upload

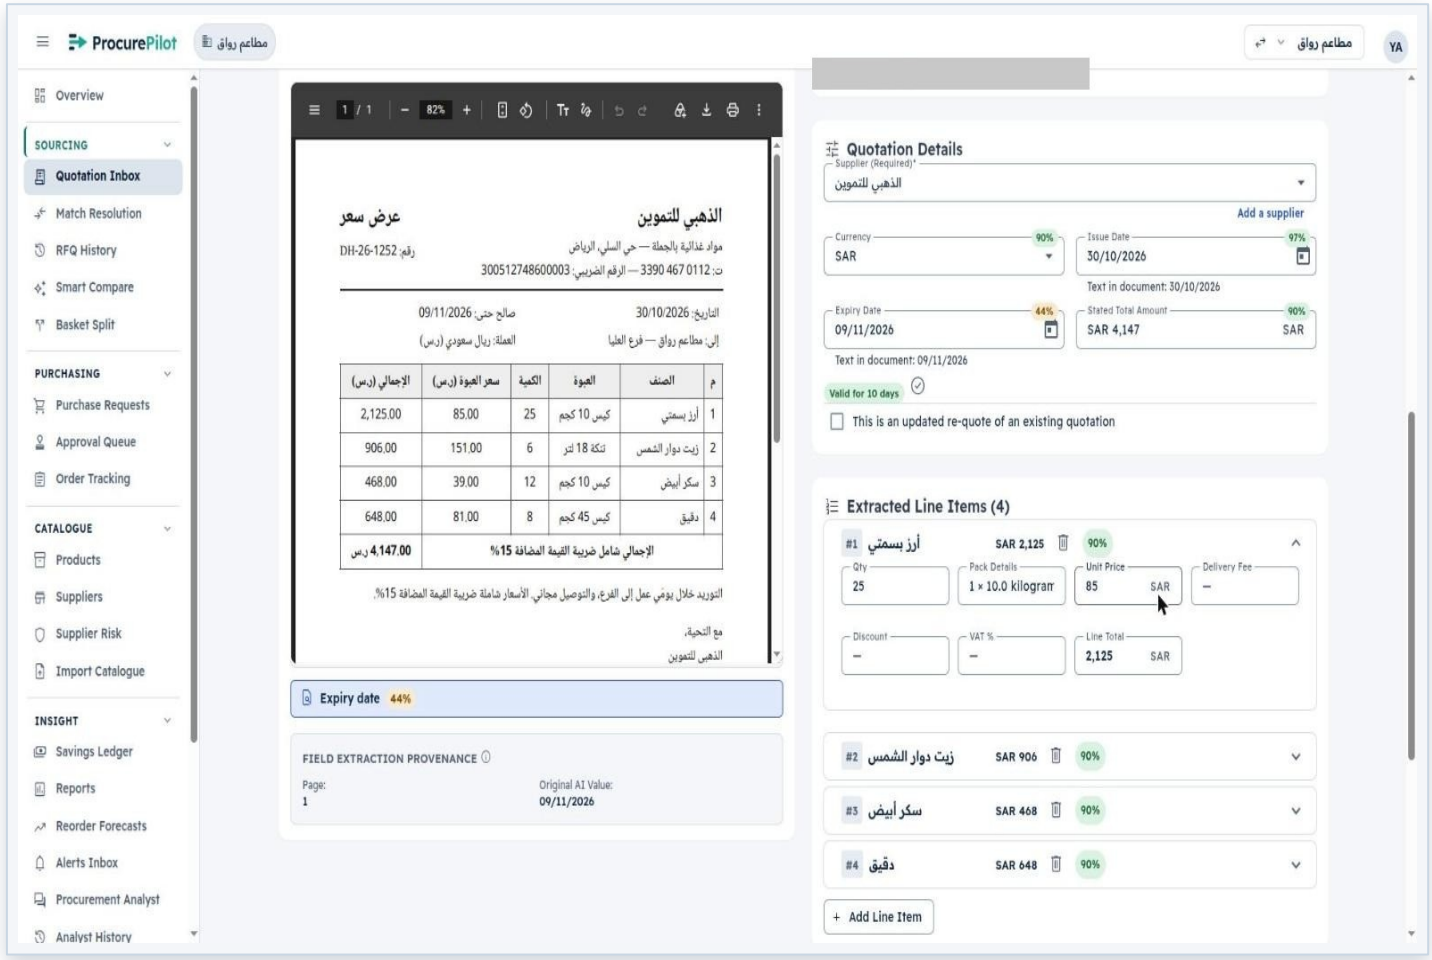

ProcurePilot reads the quotations your suppliers send by email or upload.

WhatsApp stays

Suppliers keep sending quotes on WhatsApp: save the PDF or photo and upload it, or forward it by email. There’s no direct WhatsApp connection.

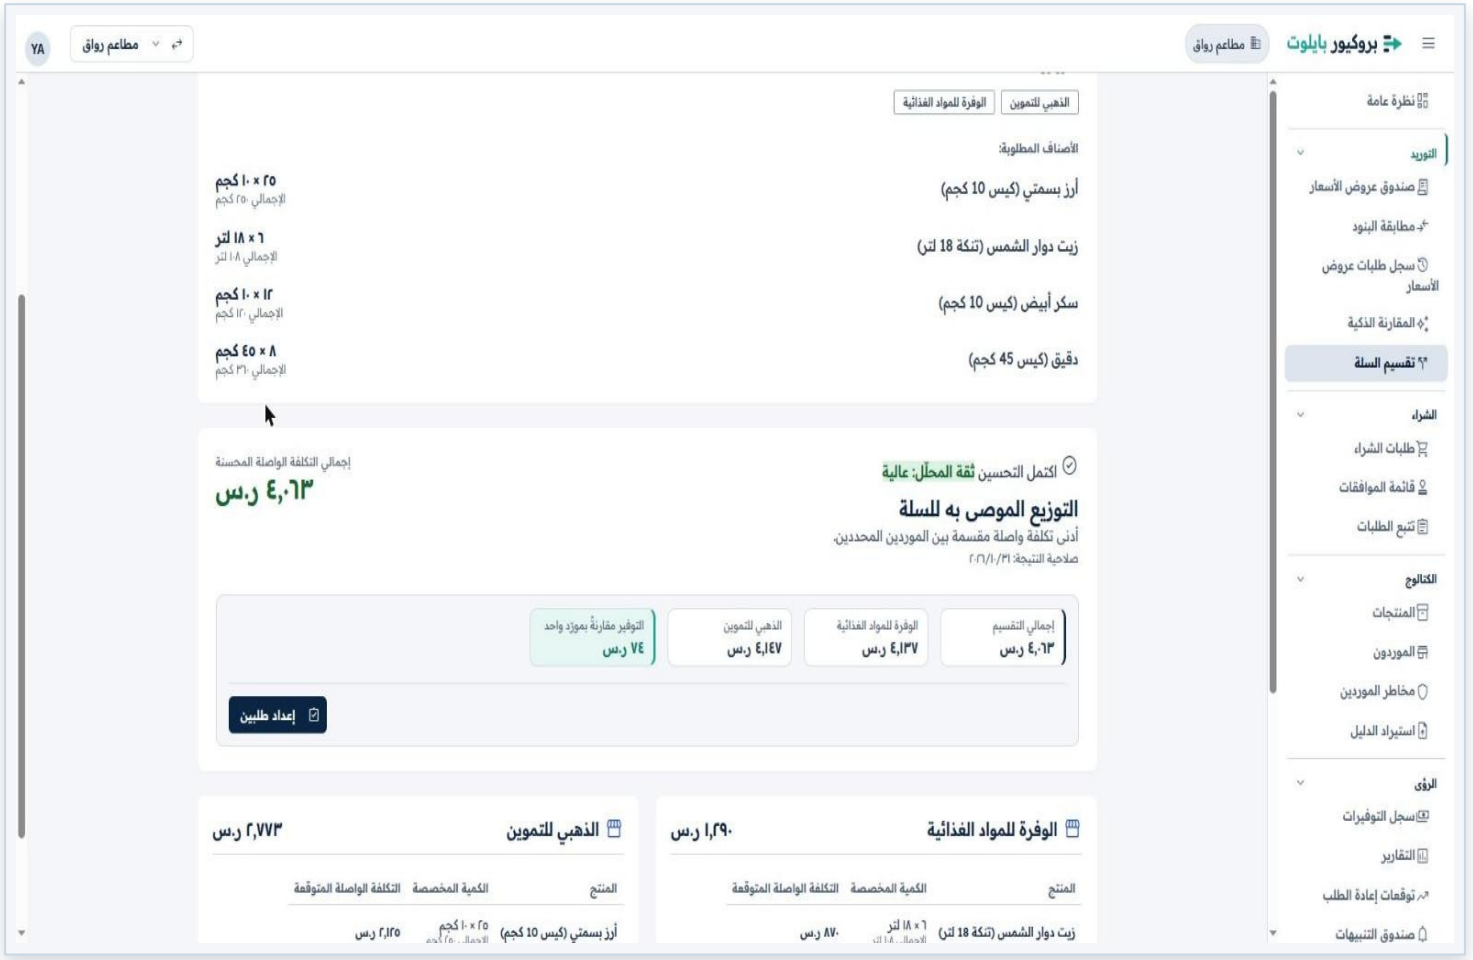

Every line traceable

Each extracted line keeps a link to its page in the source document, with a confidence score, and is reviewed before it is trusted.

Real screens with synthetic data. Saudi demo workspace «مطاعم رواق».

Compares fairly, and splits the order when cheaper

Real screens with synthetic data.

Pack for pack

Compares offers pack for pack, with each supplier’s delivery fee included, and shows the scoring.

Split the basket

Splits one order across suppliers when that lowers the total.

One currency per comparison

Works in Egyptian pounds and Saudi riyals; no exchange-rate comparison.

A person on your team approves every purchase

Nothing is ordered on its own
A person on your team approves every purchase. Nothing is ordered before that approval.

Budget in view
Branch requests reach the approver with the remaining budget shown.

From the phone
Approve purchase requests from your phone.

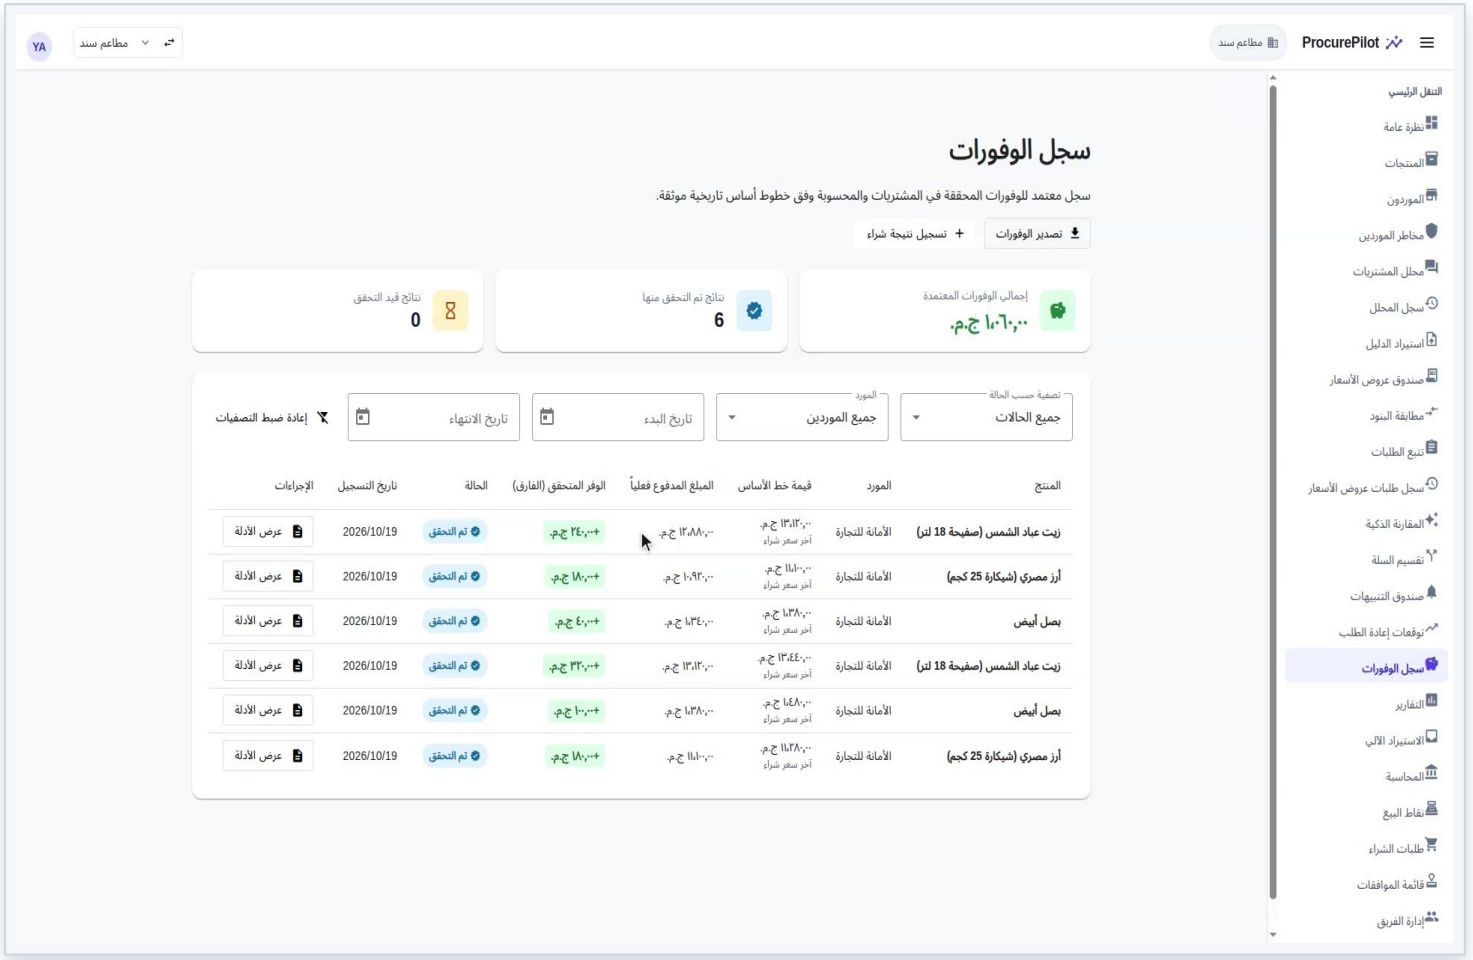

Real screens with synthetic data.

Rule 8

No autonomous purchasing. Automation prepares and routes; a human authorises.

Did you really save money, or do you just think you did?

Real screens with synthetic data. Ledger figures are demonstration data.

Verified, not assumed

A saving counts only once someone verifies its evidence.

Calculated vs verified

The ledger keeps the two apart, so owners see only savings someone has checked.

Never pair with a number

No real customer savings figure exists yet. “How much?” → “measured against your own prices in the pilot.”

Built in Arabic, in your currency, with your VAT

AR · EN

Arabic and English interface, including Arabic supplier quotes and Arabic-Indic digits

EGP

Egyptian pounds, with Egypt’s 14% VAT

SAR

Saudi riyals, with Saudi Arabia’s 15% VAT

Your data is not used to train AI models.
Quote the privacy policy’s wording; don’t stretch it to “secure” or “compliant”.

بروكيور بايلوت

Not supported: KWD, BHD, OMR (three-decimal currencies) and cross-currency comparison.

Who it is for — and who it is not for

Who buys

Multi-branch restaurant groups in Egypt and Saudi Arabia with central purchasing (restaurants first; other multi-supplier companies next, MD-20).

People we talk to

Owner / GM (approves, wants verified savings) · Purchasing or operations manager (compares quotes) · Branch manager (requests from the phone).

Markets

Egypt (Egyptian Arabic, EGP) and Saudi Arabia (Gulf Arabic, SAR). First pilot lands in Egypt.

NOT FOR

- Single-outlet businesses without central purchasing
- Teams that need a direct WhatsApp, POS or ERP integration on day one
- Kuwait, Bahrain or Oman (three-decimal currencies)
- Anyone expecting autonomous purchasing

Approved headlines, in three voices

English	Egypt (Egyptian Arabic)	Saudi Arabia (Gulf Arabic)
The cheapest quote isn’t always the cheapest order.	أرخص عرض سعر مش دايماً أرخص طلبية.	أرخص عرض سعر مو دايم أرخص طلبية.
Did you really save money, or do you just think you did?	وفّرت فعلاً.. ولا فاكر إنك وفّرت؟	وفّرت فعلاً.. ولا تحسب إنك وفّرت؟
Call to action: Talk to us about a pilot	كلّمنا عن التجربة	تواصل معنا عن التجربة

Supporting sentence: ProcurePilot reads the quotes your suppliers send, in Arabic or English, compares them on their true landed cost, and counts a saving only once someone on your team verifies it. A person approves every purchase.

Arabic lines still need a native check per market before publishing.

Rules for every public piece

Do

- Use only the 16 approved claims (C-01 to C-17, except C-13), with their limits
- Label every product screen: “Real screens with synthetic data.”
- Say “invitation-only pilot, free for the agreed pilot period”
- Say “built in Arabic” and “Built by Iron Systems”
- Keep WhatsApp’s limitation in the same sentence

Don’t

- Savings %, money saved or time saved — no real customer data yet
- Customer names, logos, testimonials or case studies
- Extraction accuracy figures (not measured)
- ERP / Odoo integration, push alerts, “secure”, “bank-grade”, “certified”
- “The only Arabic…” or comparisons with named competitors

Brand at a glance: Converge

ProcurePilot

Three bars are supplier quotes compared side by side; the teal one — the best quote — keeps going as an arrow: the decision moving forward. Keep the mark unmirrored in Arabic layouts.

Readex Pro

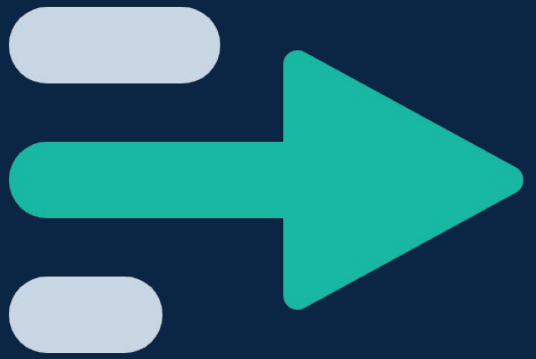

One family for Arabic and Latin (Google Fonts, OFL). Wordmark 600; body 400–500. Table figures: Noto Kufi Arabic.

Navy #0B2545	**Teal** #12A594	**Teal text** #0C7A6E
Teal on dark #19B8A4	**Mist** #C9D6E3	**Paper** #F4F6F9
